Subject: FW: Nissan Murano, Maxima, 350Z

Hi David thanks for your assistance yesterday. Hopefully this helps a few others.

I found out how to switch the bose amp on in the 2005 Nissan Murano.

Simply add power to the green/white wire, I ran a 5 amp fuse from the blue/white amp control wire from the head unit to this wire.

Also thought it was worth mentioning, I'm assuming the Bose amp requires a low level input, as the radio was excessively loud at low volume. Picture attached.

Thanks mate!
